

DIMITRI AZAR, M.D.

The Millennium Park Eye Center of the University of Illinois opens under Dr. Dimitri Azar, Head of the Department of Ophthalmology and Visual Sciences at the University of Illinois Eye and Ear Infirmary. Dr. Azar is an internationally acclaimed cornea and refractive surgeon who brings over 15 years of experience to Chicago, most recently from Harvard's Massachusetts Eye and Ear Infirmary.

Dr. Azar has published leading books on ophthalmology and refractive surgery, including the authoritative reference for refractive surgeons worldwide, *Refractive Surgery*. He has performed over 10,000 refractive surgical procedures and was the first to perform the LASEK procedure, now performed routinely around the world.

"We take a conservative approach to laser vision correction surgery, taking time to work with our patients individually and in-depth to make sure they understand the treatment options available to them and what kind of result they can expect."

Dr. Azar's mission has guided every stage in the development of the state-of-the-art Millennium Park Eye Center.
